

Crafting Precision
Built to last, designed to perform.

MTK® Crafting Precision

MTK®, named after one of the greatest inventors of all time Mikhail Timofeevich Kalashnikov, has been serving the European market since 2010. Our manufacturing facilities are located in Italy, and we focus primarily on accessories for Soviet/Russian firearms, such as AK, SVD and SKS. In the past years production has been extended to the AR15 platform, 1911 handgun and CZ Shadow components. All items for Russian firearms are based on original Izhmash factory blueprints (mil-spec). In 2024 MTK USA was created to properly serve the US market and clients. MTK® merges state-of-the-art production, engineering, innovative design, well-known Italian firearms tradition and the legendary Russian reliability. This makes MTK® accessories and components unique, ergonomic, aesthetically appealing, but at the same time durable and made to work hard in any condition.

Global Reach

Strategically located few miles away from Milan cargo airport, MTK® is owned by Avrora International having a long-standing history in distributing firearms and accessories. Its extensive experience allowed to establish strategic partnerships with renowned manufacturers such as the Izhmash factory itself (suspended due to sanctions).

Custom Solutions

Beyond our standard product line, we also offer comprehensive OEM services, tailoring our products to meet manufacturers and distributors specific needs.

Materials

Alluminum: only certified aerospace alloys made in Italy (same supplier with Italian F35 factory). Mainly 6082T6 or 7075T6 depending on technical requirements. Steel: as above! C45, 4140, 440C and 17.4-PH steel, depending on the technical requirements Wood: all components are made from Grade 3 Italian walnut (AA+/AAAA range is possible). In addition, MTK® is the only one in EU producing luxury grips in quebracho colorado*, the hardest wood in the world (up to 2,5 harder than mahogany). Grips, handguards and stocks are CNC machined from solid blocks of wood. Walnut is our standard but also hi-tech multilayers is used. Rare exotic wood like quebracho colorado* is used for luxury 1911 grips as well as G10 polymer for 1911 and CZ competition/tactical grips. Other components are all CNC machined from steel or aluminum alloys. DMT (Dual Metal Technology®) is used to reduce overall weight, but to retain strength and reliability.

*Quebracho colorado (quebracho means that break the axe) is one of the hardest woods of the planet, its cut has been banned since 1959 and it's a limitless duration. Our stock is made by seats of an Argentinian stadium ca. 150 years old. It's totally waterproof and it's polished as metal (sandpaper up to 2500 grit). It's extremely rare.

Coating

Wood is hand polished and coated with our proprietary mixture of linseed and tung oil by undergoing our exclusive high pressure and vacuum stabilization saturation process. Wood can be left natural or stained "tactical black" color, our exclusive process to make solid wood black. This process does not modify the unique characteristics of wood for which it is loved (no polymer can provide the same aesthetics and performance as wood). We, at MTK®, trust that this type of traditional coating is still the best and the most durable, and with proper maintenance, it will last a lifetime. Aluminum is always hard anodized while steel can be blued, cerakoted or, if required, carbonitriding is applied.

Company values

Our mission is providing our customers with top quality products born from our personal passion and our long-time experience. Our commitment is manufacturing a craftsmanship level product, maximizing the clients' value for money, by using innovative and smart technologies. This sets us apart in the industry. MTK® is a family business based on solid tradition.

AK MODERNIZATION

Modern tactical rifles need to be equipped with proper devices (red dots, collimators, lights, bipods, front grips, etc). Until RU AK12/15/19 -series, AKs were not properly designed for that. The optic side mount (if any) is bulky or requires expensive dedicated optics.
Current RU AKs are equipped with native picatinny rails for an endless range of devices. MTK® modernization kit is designed to align the earlier AK models with the latest RU AK12/15/19 functionalities.

Modernization kit includes dust cover, handguard and a variety of stocks (fixed or foldable). The field assembly/disassembly of MTK® dust cover and forend is the same as the originals and they do not need screws, various mechanisms or tools. Thanks to DMT® (Dual Metal Technology) strength and durability are as good as with the original parts. Handguard has 6 MLOK slots available.

RU AK74M

RU AK19

RU AK74M with MTK® Modernization kit

COMPATIBILITY:

MTK® components are designed to the exact Russian mil-spec dimensions (Kalashnikov - Izhevsk factory) so they are generally compatible with most of Eastern European versions of the AK with stamped receivers, as well as the Chinese Type-56 and current production Norinco/SDM. Minor fitting may be required due to tolerances. No firearm modification is required, field disassembly as the original.

MATERIALS:

The steel parts are made from phosphate finished carbon steel. Rails, assembly components, stocks, etc. are CNC machined from aluminum and hard anodized. The “Jungle version” is painted (high-performance thermo-hardening resin) while the “Marine version” is made from stainless steel.

MTK-WGDC22 - MTK-WGDC24

DUST COVER

it fits from AKM series to RU AK200 series and any Saiga. Made with dual-metal technology, it has a phosphated steel casing while the picatinny rail and supports are in ergal. Assembling like the original, it's very stable. Picatinny for sake of rigidity picatinny may accept mounts with single anti-slip stop.
Gas block versions:
Fm AK47 to AKM (including western Europe and Chinese) 24mm (15/16")
Fm AK74 SAIGA 22mm (55/64")

MTK-WGHG

FOREND/GAS TUBE COVER

Designed for any AK model excluding those with milled receiver. Field disassembly as the original. The 6-slot M-LOK slots provides a wide option of accessories. It is compatible with original belt loop and cleaning rod. Minor fitting may be required due to tolerances among different versions.

info@mtkusa.net - info@mtkclub.eu

buttstocks interfaces:

All the following items may be installed without any firearm modification:

ADAPTOR FOR FIXED STOCK (VSP)

MTK®'s aluminum fixed stock adaptor is compatible with all Russian mil-speck stamped receivers. Minor fitting may be required for non-standard (non RU mil-spec) versions.
Allen key and screws are provided.

MTK-VSP

VSP INSERT ALUMINUM INSERT FOR VSP.

Allows for quick stock changes, providing a firm and tenacious lock. Stocks with this adapter may be fixed or collapsible type. When combined with the FSS insert, it also adds the foldable function.

MTK-VSP-INS

FOLDABLE STOCK SYSTEM (FSS)

Our revolutionary foldable stock system FS is MTK®'s "crown jewel". This system allows the installation of a foldable stock on a regular fixed stock AK and SVD. It's extremely narrow, only 5/8" (15mm) thick and it may be easily operated with just one finger. It does not get stuck and it's extremely durable (locking section is not less than the original RU system). CNC machined from solid steel. It allows the stock to fold 180°.
Allen key and screws are provided.

MTK-FSS

LH FOLDABLE (STANDARD RU)

CNC made in solid steel it applies on RU and KR (Kalashnikov USA) versions and any other model with similar system. Made in solid steel. Pin is not provided. Also available adaptorfor 4,5 pin.
MTK-LHFLD

MTK-P55P

MTK-P55R

TULA SERIES AK WALNUT FOLDING STOCK

MTK Folding Stock in Grade 2+/3 Solid Walnut.

This premium folding stock, offers superior materials and innovative features for the modern AK platform.

Key Features:
Material: Solid Walnut, Grade 2+/3.
Finish: Hand-finished with natural oil.
Retention: Features magnetic retention when folded.
Buttpad: Flat metal buttpad.

Compatibility: Fits MK/MKK series and AK rifles utilizing a 5.5mm pin (4.5mm compatible via adapter).

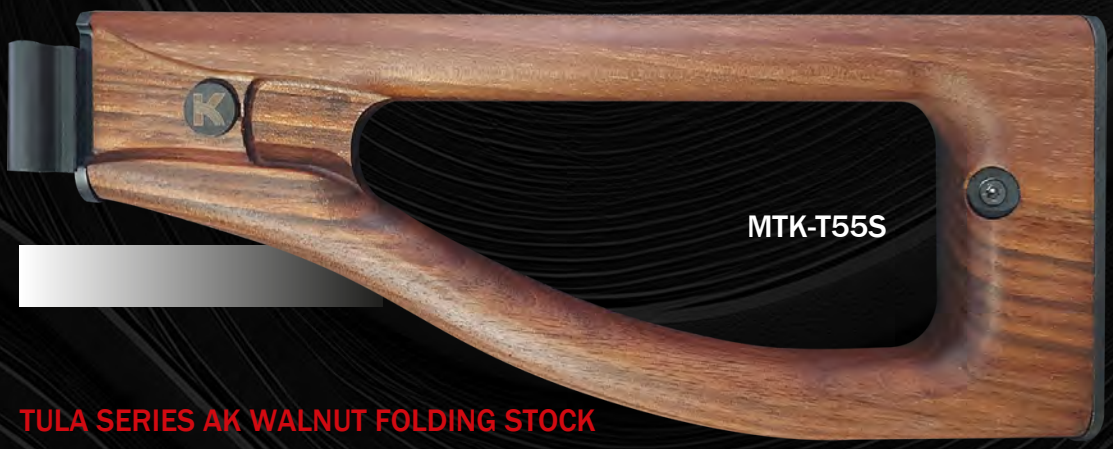

Optimized Folding: The specific design allows the stock to fold securely to the side without interfering with the side rail or the receiver rivets.

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

MTK TULA SERIES FOLDING STOCK, SOLID WALNUT (VSP FOLDING)

The MTK Tula Series Stock is the ideal choice for those who wish to combine the classic aesthetic of Russian tradition with modern tactical functionality. Crafted with premium materials and artisanal finishes, it offers a touch of elegance without sacrificing robustness.

Essential Requirement for Installation

The VSP Interface (Sold Separately) is required for mounting. The stock cannot be installed directly onto the firearm's receiver without this interface.

Materials and Artisanal Finish

The heart of this accessory is uncompromising quality:

Premium Wood: Selected Solid Walnut, Grade 2+/3.

Oil Finish: Processing and finishing are executed by hand with natural oil, which enhances the walnut's grain and ensures its long-term durability.

Technical Details: The buttplate (Flat Pad) is entirely made of metal, and the latch mechanism is precision-machined from a solid block using the CNC method.

Functionality and Smart Design

The MTK design has been optimized to ensure superior practicality and compatibility:

Magnetic Retention: A magnetic locking system is integrated to keep the stock firmly in place when folded.

Anti-Interference Folding: The specific engineering of the stock allows for lateral folding without interfering in any way with the side rail and the receiver rivets.

Proudly 100% made in Italy.

MTK®

AK MAG-LOCK GRIP

AK Mag-Lock Aluminum Pistol Grip with Wood Panels: MTK-GT-WAK

Engineered for discerning shooters, this grip features a heavy-duty aluminum core (frame) that ensures absolute structural rigidity and a rock-solid fit onto the receiver. The real breakthrough lies in the panel-mounting system: thanks to powerful integrated magnets, the wood grip panels snap securely onto the aluminum frame with ease.

This "invisible" locking system not only guarantees a firm, reliable hold during firing but also removes the need for side-through screws, preserving the natural elegance and grain of the wood. The panels feature fine laser-checkered diamond patterns on the sides to deliver maximum grip, even with wet hands or tactical gloves.

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

MTK®

AK GRIP

AK grip natural walnut color: MTK-GRIP-AK-1

AK grip tactical black: MTK-GRIP-AK-2

CNC machined from select walnut blocks, available in natural color or in tactical black. Compatible with any AK model. Its shape is inspired by the 1911 pistol grip profile and provides terrific ergonomics. It uses the standard screw, but a more practical Allen key screw is provided.

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

MTK®

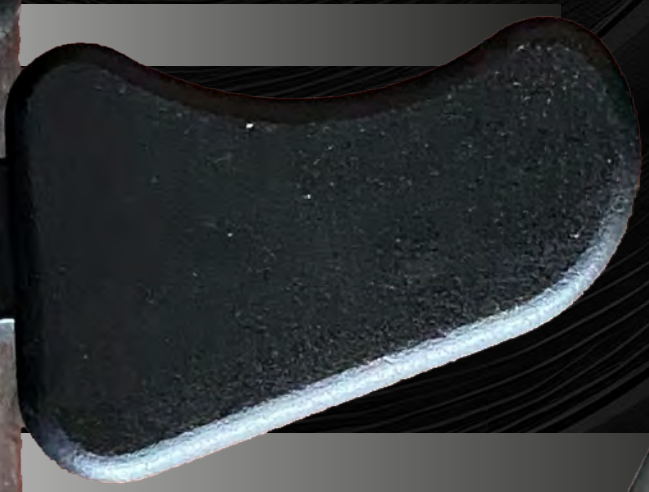

EXTENDED CHARGING LEVER AK

A market standard. Due to AK lever geometry, this system is quite common and used also for other firearms (i.e. Benelli/Beretta shotguns). We simply increased the thickness and the grain size to make it more slip resistant.

MTK-CH-B

Proudly 100% made in Italy.

ERGONOMIC CHARGING LEVER AK

This is our invention. It's an aluminum shell that goes over the standard AK charging handle and provides much better ergonomics (even with gloves). This solution is much more stable and does not move even after thousands of rounds. Due to the AK production tolerances, it's made to accommodate the smallest size AK charging handles, thus minor and easy fitting may be required. Allen key and screws are provided.

MTK-ECH2

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

handguard kit AK-SAIGA

Classic handguard kit AK-SAIGA walnut: MTK-WHG-CL

The MTK Classic AK Walnut Handguard Kit is designed for shooters who appreciate the traditional aesthetics and tactile feel of real wood. Crafted from high-quality walnut (Grade 1+/2), this kit provides a premium upgrade for your rifle's furniture.
Natural Protection: Pre-finished with natural linseed oil, providing a smooth, weather-resistant barrier that highlights the rich grain of the walnut wood.
Broad Compatibility: Fits AKM series rifles, including military surplus, AK74, and Saiga MK/MKK models. (Note: Not compatible with milled receivers).
Classic Configuration: The set includes both the lower handguard and the upper gas tube cover. It is fully compatible with standard cleaning rods.
Custom Fit: Due to the organic nature of walnut wood, minor hand-fitting may be required to achieve a rock-solid lockup on your specific firearm.

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

MTK®

HANDGUARDS

AK handguards in natural walnut color: MTK-WHG2

AK handguards in tactical black: MTK-WHG2B

CNC machined from select walnut blocks, available in natural color or in tactical black. Unlike other handguards, these are ventilated to avoid over-heating in case of serious shooting as well as to drain dust and water. It accepts the standard cleaning rod. Minor fitting may be required due to the tolerances of various models. It is compatible with all Russian type AK models apart those with milled receivers

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

MOUNTS

Rear Sight Rail (RSR)

The simplest and cheapest solution to have a picatinny rail on your AK. It replaces the rear sight leaf but is zeroed in to a 100m range. Two lengths are available 3.3” (85mm) and 4,9” (125mm). Shorter for red dots, longer for small optics. It is extremely durable. Mount does not need any permanent modification. It fits all AK models.

REAR SIGHT RAIL 85
MTK-RSM-85

REAR SIGHT RAIL 125
MTK-RSM-125

Side Mount (DUO)

Thanks to its special design, DUO fits both AK (rear lock pin) and SVD (front lock pin) side mounts. Constructed from aerospace alloy and hard anodized it’s resistant to heavy duty stress. It comes with 2 rails 2,5” (65mm) and 4,9” (125mm) for red dot or scope use. Coupling between mount and rails is guided to assure the perfect alignment even in case of frequent interchanges. It fits any AK and SVD mil-spec side mount.

MTK-DUO

Minimal (Min)

Extremely light and small side mount it is designed for red dot. Do not need to be removed for dust cover disassemblying.

MTK-MINIMAL

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

MTK®

BARREL CLAMP - BC

Compatible with both AK and SVD platforms, this rail is primarily designed for mounting bipods. Its Picatinny rail also allows for the attachment of accessories such as laser sights, flashlights, front grips, and more.
All made in solid alloys to limit the weigth.

MTK-BC2S

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

MTK®

SVD FOLDING STOCK

This SVD/Tigr adapter provides a significant ergonomic upgrade. This extremely innovative system, based on our FSS allows the replacement of the regular SVD stock with a foldable one with an AR15 type pistol grip with an angle precisely engineered to replicate the renowned 1911, ensuring exceptional comfort and control.

MTK-SVD-M4SS

STANDARD AR15 FOLDABLE BUFFER TUBE

Side-folding M4/AR15 buffer tube adapter, enhancing the rifle's versatility and adaptability. MTK-SVDFS-M4

SAIGA 12 HANDGUARD

Premium Walnut Wood Handguard for Saiga-12: MTK-S12-HG

The MTK Saiga-12 Handguard is the ultimate choice for those looking to restore the iconic aesthetic and natural feel of wood to their Saiga-12 platform. Crafted from premium Walnut wood (Grade 1+/2), this set combines mechanical strength with a timeless, classic look.

Advanced Manufacturing: Our production process sets us apart. While most manufacturers use vacuum systems to hold wood during machining, we utilize heavy-duty pneumatic presses on our 5-axis CNC machines. This rigid clamping eliminates micro-movements, allowing us to achieve ultra-tight tolerances that vacuum systems simply cannot match.

Artisan Finish: Each handguard is hand-finished and treated with natural linseed oil. This traditional method enhances the walnut's rich grain patterns while providing deep protection against moisture and humidity, ensuring a superior grip and a warm, organic feel.

Proudly 100% made in Italy.

info@mtkusa.net - info@mtkclub.eu

SAIGA 12 GRIP AND STOCK KIT

Grip and stock KIT for Saiga-12: MTK-S12-KIT

Upgrade your Saiga-12 with our dedicated Grip & Stock Kit,
designed for shotgun models featuring a rearward trigger guard configuration.

Kit Includes:
MAG-LOCK Pistol Grip: Crafted from high-grade walnut, providing exceptional durability and a classic, premium look.
VSP Adapter Base made in Quebracho wood,: Serves as the foundation for seamless integration with our complete line of VSP-compatible buttstocks.

Key Features:
Enhanced Ergonomics: Delivers a firm, comfortable hold and significantly improves overall weapon control and handling.
Folding Capability: Allows for the installation of a folding stock setup, making transportation and compact storage effortless.
Modularity: Fully compatible with all VSP-system stocks to suit your specific shooting preferences.

Artisan Finish: Each kit is hand-finished and treated with natural linseed oil. This traditional method enhances the walnut's rich grain patterns while providing deep protection against moisture and humidity, ensuring a superior grip and a warm, organic feel.

Proudly 100% made in Italy.

AR15 MAG-LOCK GRIP

MTK AR15 Mag-Lock Aluminum & G10 Pistol Grip: MTK-GT-GM4

Take your AR15's ergonomics and performance to the next level with the MTK Mag-Lock hybrid G10 pistol grip. This model pairs the structural rigidity of an aircraft-grade aluminum frame with the extreme durability of G10. Thanks to the proven "Mag-Lock" magnetic mounting system, the panels snap instantly onto the aluminum core, delivering a seamless look entirely free of uncomfortable side-through screws. The G10 panels feature a sleek, smooth finish with a precise recessed slot on both sides. Included in the box is a set of die-cut supergrip stickers, perfectly tailored to fit inside the recesses. This gives the shooter ultimate flexibility: leave the panels smooth for a clean, minimalist aesthetic, or apply the high-traction inserts for an ultra-aggressive, non-slip hold—ideal for wet conditions or tactical glove use.
The package also includes the correct imperial-thread mounting screw, ensuring native compatibility and a seamless fit with standard mil-spec and commercial AR receivers.

Proudly 100% made in Italy.

FULL SIZE AND COMMANDER
LUXURY AND STANDARD GRIPS

Crafted from rare 150-year-old Quebracho Colorado, one of the world's hardest and most coveted woods. Its exceptional density makes it 30% heavier than water and twice as hard as ebony or ironwood, ensuring unparalleled durability and near-waterproof resilience. With proper care, these grips will last a lifetime. Each grip is CNC machined from select wood blocks and meticulously hand-polished to a mirror-like finish using progressively finer grits up to 2500, the same technique used to perfect the gloss on luxury automobiles. The result is a glass-smooth surface that exemplifies the wood's natural beauty. Also available in natural oil finish walnut(Grade 2+). Engraving options are available upon request.
